Panel Discussion
Data as a Foundation for Cancer Prevention and Control
James Harvey, Bryan Health Cancer Registry | Christophe Irumva, Nebraska Cancer Registry | Jeff Armitage, Nebraska BRFSS

Why is data important in cancer prevention and control? This session will follow the process of data collection, reporting, analysis, use and evaluation.

- Participants will be able to describe data collection & reporting process at a cancer center
- Participants will be able to identify one way that data in the cancer registry is used for cancer prevention and control.
- Participants will be able to identify one way that data in Nebraska BRFSS is used for cancer prevention and control.

Opening Keynote
Cancer Prevention Through Community Systems for Children
David Dzewaltowski, PhD | Endowed Community Chair and Professor, University of Nebraska Medical Center College of Public Health

Cancer prevention for children requires local communities, organizations, and leaders to provide systems for physical activity, healthful eating and other preventive health behaviors. Dr. David Dzewaltowski will review how community systems vary in the opportunities for preventive health behaviors and why geographic location matters for children and families. He will discuss the challenges in modifying community practices, will provide a review of evidence-based community systems interventions, and will discuss Dzewaltowski Laboratory’s recent success.

- Participants will be able to define community systems.
- Participants will be able to identify the challenges in improving community systems for cancer prevention.
- Participants will be able to discuss evidence-based community systems interventions for cancer prevention.

Interactive Breakouts
Components of Cancer Prevention and Control in Nebraska

Through these interactive sessions, participants will discuss a selected component of cancer prevention and control and identify ways to increase personal engagement in their communities.

- Participants will review selected component of cancer prevention and control.
- Participants will identify one way they can engage in cancer prevention and control in their community.

Lunch Keynote
Legislative Update
Nick Faustman | American Cancer Society Cancer Action Network

- Review NE legislative agenda affecting cancer control.
- Define strategies to improve cancer control policies.
- Identify ways individuals and organizations can get involved in policy efforts.

Afternoon Keynote
Legal Services as a Component of Cancer Care
Ann Mangiameli, JD | Health, Education & Law Project (HELP), Legal Aid of Nebraska

This session will review ways that hospitals collaborate with lawyers to address patient’s unmet legal needs and identify ways that cancer patients are especially susceptible to legal problems that can affect the success of their treatment.

- Define the role of medical-legal partnerships in healthcare settings.
- Review social factors that contribute to the poor health of cancer patients.
- Identify ways to screen cancer patients for health-related social needs.

Closing Keynote
Working Better Together: What It Really Takes!
Jennifer Redmond-Knight, DrPh | Assistant Professor, University of Kentucky College of Public Health

We often hear about the need to work in teams, partnerships and coalitions but we don’t often talk about how to do it. This session will focus on key principles and practical solutions needed in order to work better together to make a significant health impact. Learn about how the Kentucky Cancer Consortium worked with diverse partnerships to move from a colorectal cancer screening rate of 34.7% in 1999 to 70.1% in 2016 and a change in national ranking from 49th to 17th.

- Describe key principles needed to work together in partnerships.
- Identify challenges that need to be addressed when working in partnerships.
- Discuss practical strategies that helped Kentucky significantly increase colorectal cancer screening rates.
$75 NC2 Members (includes your 2019-2020 NC2 membership)
$90 Non-members
$30 Students; Survivors
